

DIY Moveable Hose Hanger Post

Clean up your yard with this sturdy, mobile hose hanger post. Great for gardens, driveways, or anywhere you need flexible hose storage.

Materials:

- 4x4 post (about 4 to 5 feet tall)
- Scrap plywood or small concrete base
- Hose hanger hardware
- Screws and drill
- Optional: paint or stain

Steps:

1. Cut your 4x4 post to the desired height.
2. Attach a base using a plywood platform or mount into a concrete-filled bucket.
3. Screw hose hanger hardware into the top of the post.
4. Paint or stain for weather protection.
5. Place anywhere you need to store a garden hose!
